/economy withdraw	Move bank money back into cash in hand.	Economy.py

Fun, Social & Quotes

Command	Description	Source
/act	Perform an action on yourself with a GIF.	Act.py
/action	Send a dramatic RP action with a GIF.	Actions.py
/fun coinflip	Flip a coin	Fun.py
/fun compliment	Compliment a user	Fun.py
/fun howgay	Check how gay someone is	Fun.py
/fun meme	Get a random meme	Fun.py
/fun os	Start an Operating System	Fun.py
/fun populate	Spices up a dead channel with a random prompt	Fun.py

Command	Description	Source
<code>/fun roast</code>	Roast a user (light-hearted)	Fun.py
<code>/fun rps</code>	Play Rock Paper Scissors vs the bot or another member (public)	Fun.py
<code>/fun tictactoe</code>	Play Tic Tac Toe vs another user	Fun.py
<code>/fun wyr</code>	Would you rather...? Vote and see the crowd favorite!	Fun.py
<code>/quote</code>	Get a random quote or specific quote	Quote.py
<code>/quotes add</code>	Add a custom quote to this server	Quote.py
<code>/quotes list</code>	List this server's custom quotes	Quote.py
<code>/quotes my</code>	Custom quote of your premium server	Quote.py
<code>/quotes remove</code>	Remove a custom quote from this server	Quote.py

Giveaways

Command	Description	Source
<code>/giveaway create</code>	Setup a brand new giveaway	Giveaways.py
<code>/giveaway fast</code>	Quickly start a giveaway in this channel	Giveaways.py

Messaging & Automation

Command	Description	Source
<code>/direct message</code>	Send a direct message through the bot	CC'ed.py
<code>/direct receive</code>	Receive the full direct message transcript with a user	CC'ed.py
<code>/dropdown embed</code>	Setup a common FAQ-style embed (Admins Only)	Dropown.py
<code>/embed build</code>	Create and save a embed message template	Embed.py
<code>/embed delete</code>	Remove one of your saved messages	Embed.py
<code>/embed repeat</code>	Send a saved message from this server repeatedly at an interval	Embed.py
<code>/embed retrieve</code>	Send a saved message from this server here	Embed.py
<code>/embed stoprepeat</code>	Stop all repeating messages in this server	Embed.py
<code>/forum</code>	Create a customized forum for your server.	Forum.py
<code>/npc activate</code>	Activate an NPC or NPC Group	Npc.py
<code>/npc create</code>	Create a new NPC or NPC Group	Npc.py
<code>/npc deactivate</code>	Deactivate active NPCs in this channel	Npc.py
<code>/npc delete</code>	Delete an NPC or NPC Group completely	Npc.py
<code>/webhook</code>	Send webhook messages or open the Discord editor	Webhooks.py

Moderation

Command	Description	Source
<code>/automod</code>	Setup AutoMod in your server	Automod.py

Command	Description	Source
/blacklist kick	Kick a user (without blacklisting them)	Blacklists.py
/blacklist list	List all blacklisted users in this server	Blacklists.py
/blacklist remove	Remove a user from blacklist	Blacklists.py
/blacklist timeout	Timeout a user without blacklisting them	Blacklists.py
/blacklist user	Blacklist a user (kicks and prevents rejoin)	Blacklists.py
/clean	Wipes Each and Every message in the channel (Admins Only).	Clean.py
/editsnipe	Show the most recently edited message in this channel.	Utility.py
/lock	Lock the current channel for everyone.	Utility.py
/purge	Delete a specified number of messages from this channel.	Utility.py
/snipe	Show the last deleted message in this channel.	Utility.py
/unlock	Unlock the current channel for everyone.	Utility.py

Other Commands

Command	Description	Source
/log channel	Set the server log channel.	Log.py
/log stop	Stop server logging and remove the saved log channel.	Log.py
/slowmode	Set or remove slowmode in the current channel.	Utility.py

Reports & Documents

Command	Description	Source
/report gen	Generate a formal report.	Reports.py

Restricted / Owner

Command	Description	Source
/debug grant	Debug server sync and premium issues	Debug.py
/debug revoke	Debug server sync and premium issues	Debug.py
/engine blacklist	Add/Remove servers from the blacklist (bot cannot join)	Engine.py
/engine commands	Inspect registered commands and descriptions	Engine.py
/engine console	Download the full bot console log	Engine.py
/engine economy	Add cash to a user's economy account	Engine.py
/engine globalaccounts	Global economy account database of The Secretary	Engine.py
/engine leave	Remove The Secretary from a particular server using Guild ID	Engine.py
/engine memory	Trigger an immediate database cleanup sweep	Engine.py
/engine message	Send messages or fetch transcripts sent or received by the bot	Engine.py

Command	Description	Source
/engine premiumgrant	Grant premium to a server after purchase	Engine.py
/engine premiumrevoke	Revoke premium from a server due to early problems	Engine.py
/engine premiums	Active Premium Server Database of The Secretary	Engine.py
/engine publish	Publish a message to all community servers	Engine.py
/engine servers	Total Server Database of The Secretary	Engine.py
/engine sync	Reload The Secretary Command Panel	Engine.py
/engine topgg	Update Top.gg stats	Engine.py

Role Management

Command	Description	Source
/bulk	Bulk create or remove roles	Bulk.py
/role add	Add a role to yourself or another member	Rolls.py
/role all	Give mentioned role to all members including bots	Rolls.py
/role autoroleadd	Add role to autorole list	Rolls.py
/role autorolelist	List all autoroles	Rolls.py
/role autoroleremove	Remove role from autorole list	Rolls.py
/role bots	Give mentioned role to bots only	Rolls.py
/role info	Display information about a specific role.	Rolls.py
/role list	List all roles in the server	Rolls.py
/role members	Give mentioned role to members only	Rolls.py
/role reaction	Setup reaction roles	Rolls.py
/role remove	Remove a role from yourself or another member	Rolls.py

Server Tools

Command	Description	Source
/tools capitalize	Capitalize channel names	Tools.py
/tools categoryclone	Clone a category with same perms and name (not channels)	Tools.py
/tools channel	Create a text channel	Tools.py
/tools channelclone	Clone a channel with same perms and settings	Tools.py
/tools copy	Copy the entire structure of this particular server	Tools.py
/tools deleteall	Delete all channels possible in the server	Tools.py
/tools deletecategory	Delete a category and all the channels under the same	Tools.py

Command	Description	Source
/tools deletechannels	Delete multiple mentioned channels at once	Tools.py
/tools emoji	Apply emoji model	Tools.py
/tools forcestop	Force stop all running toolkit processes for this server	Tools.py
/tools movetocategory	Move multiple different channels to a single category	Tools.py
/tools paste	Paste the copied server structure	Tools.py
/tools role	Create a role	Tools.py
/tools sync	Sync category permissions to channels	Tools.py
/tools template	Apply a server template from template library	Tools.py
/tools wrap	Wrap channel names with begin and end strings	Tools.py

Staff & Operations

Command	Description	Source
/callout create	Create a callout in this channel	Callout.py
/callout forceend	Force end callouts	Callout.py
/callout responders	View active callout responders	Callout.py
/loa	Configure a formal Leave of Absence system in your server	Loa.py
/staff demotion	Demote a staff member (assign demoted role, remove old role optional)	Staff.py
/staff embed	Create a custom staff duty embed with On/Off Duty buttons	Staff.py
/staff infraction	Apply an infraction to a staff member (add infraction role / remove roles)	Staff.py
/staff leaderboard	Show staff leaderboard (all-time duty time)	Staff.py
/staff manage	Manage a staff profile (On/Off Duty buttons)	Staff.py
/staff promotion	Promote a staff member (assign promoted role, remove old role optional)	Staff.py
/staff register	Register a user as staff	Staff.py
/staff remove	Remove a staff member	Staff.py

Tickets

Command	Description	Source
/ticket add	Add a user to the current ticket	Tickets.py
/ticket close	Close all tickets opened by you or a selected user	Tickets.py
/ticket complex	Interactive setup for complex ticket types (Admins Only)	Tickets.py
/ticket send	Send a ticket panel embed (with dropdown) using saved types (Admins Only)	Tickets.py
/ticket simple	Interactive simple ticket setup (Admins Only)	Tickets.py

Utility

Command	Description	Source
<code>/afk</code>	Set or remove AFK status.	AFK.py
<code>/avatar</code>	Show the avatar of a user.	Utility.py
<code>/banner</code>	Show the banner of a user.	Utility.py
<code>/counter</code>	Create a live counter channel.	Counter.py
<code>/member count</code>	Show total members, humans, and bots count.	Utility.py
<code>/member info</code>	Download a text file of all server members and their join details.	Utility.py
<code>/member new</code>	Show the 10 most recently joined members.	Utility.py
<code>/member old</code>	Show the 10 oldest members by join date.	Utility.py
<code>/member young</code>	Show 10 members with the newest Discord accounts.	Utility.py
<code>/nickname</code>	Change your nickname or another member's nickname.	Utility.py
<code>/remind</code>	Set a reminder for yourself. Supports s/m/h/d.	Utility.py
<code>/serverinfo</code>	Display detailed information about the server.	Utility.py
<code>/timestamp</code>	Show the current UTC time in Discord timestamp format.	Utility.py
<code>/userinfo</code>	Display detailed information about a user.	Utility.py

Welcome & Verification

Command	Description	Source
<code>/verification setup</code>	Configure the verification system for this server	Verification.py
<code>/verification user</code>	Manually verify a user and apply configured verification roles.	Verification.py
<code>/verify</code>	Get your verification link for this server	Verification.py
<code>/welcome setup</code>	Interactive setup for welcome messages	Welcome.py
<code>/welcome test</code>	Test current configuration	Welcome.py

Detailed Command Reference

Each command entry below is derived from its cog function and includes detected parameters, permission checks, output style, visible error guards, and practical fixes.

AI & Chat

/ask

Ask the AI anything, e.g. How does Python work?

Source	Ask.py:239 (search)
Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True)

Usage

Run /ask from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
query	str	Yes	No decorator description exposed.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] Error:

Operational notes

- Context/install restrictions are declared in the command decorators.

/chat

For people who dont have friends

Source	Chat.py:192 (chat)
Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=False, private_channels=False)

Usage

Run /chat from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
personality	app_commands.Choice[str]	No	Optional premium personality for this channel Default: None.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- Optional premium personality for this channel
- [Error] Chat can only be activated inside a server channel.

- [Error] You need Manage Channels to activate chat here.
- [Error] Custom chat personalities are premium only. Try `</premium:1490606512757018665>`

Interactive prompts detected

- `**`. `-#` Mention me or reply to one of my messages here to chat.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Premium status or premium limits are referenced in this command path.

Core & Information

/about

Learn more about The Secretary™ bot.

Source	About.py:16 (about)
Output	Embed
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /about from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- <:Timeout:1423186126109282344> Latency

Operational notes

- Context/install restrictions are declared in the command decorators.
- Still sends classic Discord embeds for at least part of its output.

/alias

Show all aliases for a command or group.

Source	Help.py:371 (alias)
Output	Embed, View/buttons
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /alias from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
command	str	Yes	Command name like ban or group like fun

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- No aliases were found for `

Operational notes

- Context/install restrictions are declared in the command decorators.

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/help

Browse all available commands.

Source	Help.py:360 (help)
Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /help from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Operational notes

- Context/install restrictions are declared in the command decorators.

/info

Show info panel for The Secretary™

Source	Info.py:165 (info)
Output	Embed, View/buttons

Usage

Run /info from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/invite

Send the bot invite link

Source	Invite.py:19 (invite)
Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True)

Usage

Run /invite from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Operational notes

- Context/install restrictions are declared in the command decorators.

/ping

Check the bot's latency and response times.

Source	About.py:99 (slash_ping)
Output	Embed
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /ping from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Still sends classic Discord embeds for at least part of its output.

/prefix

View or change the server's predefined prefix

Source	Prefix.py:109 (prefix_cmd)
Output	Embed, View/buttons

Usage

Run /prefix from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] Not available *(server is not Premium)*
- `sec` *(always active, cannot be changed)*
- <:Premium:1423172345778016367> Custom Prefix
- custom_only
- [Error] Prefix settings are only available inside a server.
- You can view this server's prefixes. Only administrators can change them.
- ` Custom-Only mode — predefined prefix is ****inactive****
- Custom-Only mode is active — the predefined prefix shown above won't work until you switch mode via /custom prefix.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/premium

Check premium status

Source	Premium.py:349 (premium)
Output	Components V2

Usage

Run /premium from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- Check premium status

Operational notes

- Uses Components V2 payloads for the user-facing Discord response.
- Premium status or premium limits are referenced in this command path.

/serverinvite

Generate a professional invitation embed for this server

Source	Serverinvite.py:11 (server_invite)
Output	Components V2

Usage

Run /serverinvite from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- [Error] I do not have permission to create invites in this channel.

Operational notes

- Uses Components V2 payloads for the user-facing Discord response.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/website

View all official links for The Secretary™.

Source	Website.py:23 (website)
Output	Components V2
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /website from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- <https://the-secretary.onrender.com/premium>

Operational notes

- Context/install restrictions are declared in the command decorators.
- Uses Components V2 payloads for the user-facing Discord response.
- Premium status or premium limits are referenced in this command path.

Customization

/custom clear

Reset bot profile

Source	Custom.py:240 (clear)
Output	Text or standard interaction response

Usage

Run /custom clear from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- [Error] Admin only.
- [Error] Server is not premium. Try </premium:1490606512757018665>

Operational notes

- Premium status or premium limits are referenced in this command path.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/custom prefix

Set a custom prefix

Source	Custom.py:429 (prefix)
Output	View/buttons

Usage

Run /custom prefix from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
prefix	str	Yes	Enter prefix

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- Admin only.
- [Error] Server is not premium.

Interactive prompts detected

- Enter prefix
- `. Now choose mode:

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Premium status or premium limits are referenced in this command path.

/custom profile

Customize bot profile

Source	Custom.py:181 (set)
Output	Text or standard interaction response

Usage

Run /custom profile from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- <:Premium:1423172345778016367> Premium Version of The Secretary Get yours from </premium:1490606512757018665>
- [Error] Send avatar URL or `skip`
- Admin only.
- [Error] Server is not premium. Try </premium:1490606512757018665>
- [Error] Timeout.

Operational notes

- Premium status or premium limits are referenced in this command path.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/custom restrict

Restrict a command

Source	Custom.py:268 (restrict)
Output	Text or standard interaction response

Usage

Run /custom restrict from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
command	str	Yes	Command to restrict

Name	Type	Required	Description / Default
member	discord.Member	No	User (optional) Default: None.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- Admin only.
- Server is not premium.
- Invalid command.
- You can't restrict yourself.
- Command already globally restricted.
- User already restricted.
- Already globally restricted.

Operational notes

- Premium status or premium limits are referenced in this command path.

/custom unrestrict

Remove all command restrictions for a user

Source	Custom.py:333 (unrestrict)
Output	Text or standard interaction response

Usage

Run /custom unrestrict from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
command	str	No	Default: None.
member	discord.Member	No	User to unrestrict Default: None.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- [Error] Admin only.
- [Error] You cannot unrestrict yourself.
- [Error] Server is not premium.
- [Error] No restrictions found.
- [Error] Nothing to unrestrict.

Operational notes

- Premium status or premium limits are referenced in this command path.

Economy

/eco closeaccount

Delete your global economy account and all stored economy data.

Source	Economy.py:7197 (closeaccount)
Output	Embed, View/buttons

Usage

Run /eco closeaccount from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- This action cannot be undone

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/eco help

Browse the economy command guide.

Source	Economy.py:7097 (economy_help)
Output	Embed, View/buttons

Usage

Run /eco help from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/eco leaderboard

Show the top 10 economy accounts by total wealth.

Source	Economy.py:7108 (leaderboard)
---------------	-------------------------------

Output	Embed
---------------	-------

Usage

Run /eco leaderboard from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- No economy accounts found yet.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/eco setup

Set up economy chat reward channels.

Source	Economy.py:7268 (setup)
Output	Embed

Usage

Run /eco setup from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- This server has ****premium**** — you can register unlimited channels.
- Free plan allows up to ****2 channels****. Upgrade to premium for more.
- Premium plan — all channels active
- You need the ``Manage Server`` permission to use this command.

Interactive prompts detected

- Mention the channel(s) you want to activate for chat rewards in your ****next message**** (e.g. ``#general #rewards``).

Operational notes

- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/economy balance

View your balance or another user's public cash.

Source	Economy.py:7843 (balance)
---------------	---------------------------

Output	Embed, View/buttons
---------------	---------------------

Usage

Run `/economy balance` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	Optional[discord.Member]	No	Optional member to inspect. Default: None.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/economy bank

Open the bank menu for loans and debt payoff.

Source	Economy.py:7130 (bank)
Output	Components V2, Embed, File, View/buttons

Usage

Run `/economy bank` from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If file upload fails, check file size, attachment permissions, and whether Discord is rate-limiting the channel.
- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Loans use bank balance only

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Uses Components V2 payloads for the user-facing Discord response.
- Still sends classic Discord embeds for at least part of its output.
- May upload or return a file attachment.

/economy blackjack

Play a round of blackjack against the bot dealer.

Source	Economy.py:7709 (blackjack)
---------------	-----------------------------

Output	Text or standard interaction response
---------------	---------------------------------------

Usage

Run `/economy blackjack` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
bet	str	Yes	Amount of cash to bet.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

`/economy business`

Review and activate your owned businesses.

Source	Economy.py:8045 (business)
Output	Components V2, Embed

Usage

Run `/economy business` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.

Operational notes

- Uses Components V2 payloads for the user-facing Discord response.

- Still sends classic Discord embeds for at least part of its output.

`/economy cards`

Play Higher or Lower with card odds.

Source	Economy.py:7733 (cards)
Output	Text or standard interaction response

Usage

Run `/economy cards` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
bet	Optional[str]	No	Optional cash amount to bet. Default: None.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

/economy crash

Play Crash, a multiplier game that can wipe the bet anytime.

Source	Economy.py:7727 (crash)
Output	Text or standard interaction response

Usage

Run /economy crash from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
bet	Optional[str]	No	Optional cash amount to bet. Default: None.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

/economy createaccount

Open your global economy account.

Source	Economy.py:7058 (createaccount)
Output	Embed

Usage

Run /economy createaccount from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Your global economy account already exists and is shared across all servers.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/economy daily

Claim your once-per-24-hours daily bank payout.

Source	Economy.py:7226 (daily)
Output	Embed

Usage

Run /economy daily from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- cooldown_seconds
- Profile not found.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/economy deposit

Deposit cash in hand into your bank with tax applied.

Source	Economy.py:7610 (deposit)
Output	Embed

Usage

Run /economy deposit from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
amount	Optional[str]	No	Optional amount to deposit, or use all/max. Default: None.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.

Interactive prompts detected

- Enter a valid amount, for example `2500` or `all`.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/economy fish

Use your fishing unlock to earn cash.

Source	Economy.py:7979 (fish)
Output	Text or standard interaction response

Usage

Run `/economy fish` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

`/economy gamble`

Open a gamble panel and pick a game with buttons.

Source	Economy.py:7744 (gamble)
Output	Embed, View/buttons, Modal

Usage

Run `/economy gamble` from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

`/economy heist`

Use Heist Prep to rob another user's bank balance.

Source	Economy.py:7563 (heist)
Output	Embed, View/buttons

Usage

Run `/economy heist` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	The member whose bank you want to heist.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.
- You need ****Heist Prep**** from `/economy shop`` before running bank heists.

Interactive prompts detected

- Choose another real user for the heist.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/economy holdings

Show off your owned assets and businesses.

Source	Economy.py:8093 (holdings)
Output	Components V2, Embed

Usage

Run `/economy holdings` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.
- [Error] You do not own any assets or businesses yet.

Operational notes

- Uses Components V2 payloads for the user-facing Discord response.
- Still sends classic Discord embeds for at least part of its output.

/economy job

Use your job unlock to earn direct bank income.

Source	Economy.py:7984 (job)
Output	Text or standard interaction response

Usage

Run `/economy job` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

/economy mine

Use your mining unlock to earn cash.

Source	Economy.py:7974 (mine)
Output	Text or standard interaction response

Usage

Run /economy mine from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

/economy mines

Play Mines, a bomb-grid cashout gamble.

Source	Economy.py:7739 (mines)
Output	Text or standard interaction response

Usage

Run /economy mines from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
bet	Optional[str]	No	Optional cash amount to bet. Default: None.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

/economy rob

Try to steal cash in hand from another user.

Source	Economy.py:7389 (rob)
Output	Embed

Usage

Run `/economy rob` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	The member you want to rob.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- cooldowns
- was carrying no cash in hand, so there was nothing to steal.
- No cash was on target
- The street job failed
- No police fine this time
- Profile not found.
- No wallet cash found

Interactive prompts detected

- Choose another real user to rob.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/economy sell

Sell owned assets from highest value to lowest value.

Source	Economy.py:8117 (sell)
Output	Components V2, Embed

Usage

Run `/economy sell` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.
- [Error] You do not own any sellable assets yet.

Operational notes

- Uses Components V2 payloads for the user-facing Discord response.
- Still sends classic Discord embeds for at least part of its output.

/economy shop

Open the economy shop browser.

Source	Economy.py:7958 (shop)
Output	Components V2

Usage

Run /economy shop from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.

Operational notes

- Uses Components V2 payloads for the user-facing Discord response.

/economy slots

Roll a three-slot machine for risky payouts.

Source	Economy.py:7715 (slots)
Output	Text or standard interaction response

Usage

Run /economy slots from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
bet	str	Yes	Amount of cash to bet.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

/economy spin

Spin the economy wheel for a random betting outcome.

Source	Economy.py:7721 (spin)
Output	Text or standard interaction response

Usage

Run `/economy spin` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
bet	str	Yes	Amount of cash to bet.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Operational notes

- No special operational path was detected beyond the slash command itself.

/economy stocks

Open a live stock graph using bank balance.

Source	Economy.py:7786 (stocks)
Output	Text or standard interaction response

Usage

Run `/economy stocks` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
stock	Optional[str]	No	Choose a stock market Default: None.

Choices

stock: SEC - Secretary Dynamics (SEC); NOVA - Nova Robotics (NOVA); EMBER - Ember Energy (EMBER)

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.
- You already have an open stock market. Close it before opening another.
- Failed to create stock panel: ``

Interactive prompts detected

- Choose a stock market

Operational notes

- No special operational path was detected beyond the slash command itself.

/economy transaction

View your lifetime financial summary and liquidity state.

Source	Economy.py:7867 (transaction)
--------	-------------------------------

Output	Embed
---------------	-------

Usage

Run /economy transaction from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Total passive income from businesses only
- Profile not found.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/economy transfer

Transfer bank money to another user.

Source	Economy.py:7345 (transfer)
Output	Embed

Usage

Run /economy transfer from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	The member who should receive the bank transfer.
amount	str	Yes	Amount to transfer (e.g. 500, all, max).

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- cooldowns
- Profile not found.

Interactive prompts detected

- Choose another real user for the transfer.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/economy withdraw

Move bank money back into cash in hand.

Source	Economy.py:7666 (cashout)
---------------	---------------------------

Output	Embed
---------------	-------

Usage

Run `/economy withdraw` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
amount	Optional[str]	No	Optional amount to cash out, or use all/max. Default: None.

Possible issues, errors, and fixes

- If an economy action fails, check that the user has an economy account and enough balance/items for the action.

Visible error / guard messages in code

- Profile not found.

Interactive prompts detected

- Enter a valid amount, for example ``2500`` or ``all``.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

Fun, Social & Quotes

/act

Perform an action on yourself with a GIF.

Source	Act.py:41 (act)
Output	Components V2
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True)

Usage

Run /act from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
option	str	Yes	Choose an action

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] That act doesn't exist.
- [Error] I lack permission to send embeds.
- [Act command] Unexpected error:
- [Error] Unexpected error:

Interactive prompts detected

- Choose an action

Operational notes

- Context/install restrictions are declared in the command decorators.
- Uses Components V2 payloads for the user-facing Discord response.

/action

Send a dramatic RP action with a GIF.

Source	Actions.py:40 (action)
Output	Components V2
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True)

Usage

Run /action from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.User	No	Target user Default: None.

Name	Type	Required	Description / Default
option	str	No	Choose an action Default: None.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] Cannot be used on Roles, only specific Users.
- [Error] Please select an action.
- [Error] That action doesn't exist.
- [Error] I lack permission to send embeds.
- [Action command] Error:
- [Error] Unexpected error:
- # <:Owner:1419208982236495902> You Can't Cook the Chef Can Ya?

Interactive prompts detected

- Choose an action
- # <:Error:1423194250203365458> Please select an action.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Uses Components V2 payloads for the user-facing Discord response.

/fun coinflip

Flip a coin

Source	Fun.py:271 (coinflip)
Output	View/buttons
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /fun coinflip from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.

/fun compliment

Compliment a user

Source	Fun.py:787 (compliment)
--------	-------------------------

Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /fun compliment from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
member	discord.Member	No	Default: None.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- [Error] Aww, you really liked me, I'm flattered.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/fun howgay

Check how gay someone is

Source	Fun.py:889 (howgay)
Output	Embed
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True)

Usage

Run /fun howgay from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
member	discord.Member	No	The user to check defaults to you Default: None.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- Extremely Fabulous! <:Premium:1423172345778016367>
- [Error] I am straighter than you are

Operational notes

- Context/install restrictions are declared in the command decorators.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/fun meme

Get a random meme

Source	Fun.py:808 (meme)
Output	View/buttons
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /fun meme from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] No memes found in JSON.
- [Error] Failed to load meme. `

Operational notes

- Context/install restrictions are declared in the command decorators.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/fun os

Start an Operating System

Source	Fun.py:852 (start_os)
Output	View/buttons
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /fun os from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.

/fun populate

Spices up a dead channel with a random prompt

Source	Fun.py:867 (populate)
Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True)

Usage

Run /fun populate from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] Humans don't know this answer!
- [Error] The question bank is currently empty or file missing.

Operational notes

- Context/install restrictions are declared in the command decorators.

/fun roast

Roast a user (light-hearted)

Source	Fun.py:766 (roast)
Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /fun roast from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
member	discord.Member	No	Default: None.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- [Error] Nice try, next time try something original.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/fun rps

Play Rock Paper Scissors vs the bot or another member (public)

Source	Fun.py:290 (rps)
Output	View/buttons
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /fun rps from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
opponent	discord.Member	No	Default: None.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] You can't challenge bots!
- [Error] You can't challenge yourself!
- # <:Bullet1:1423202134601633913> Rock Paper Scissors Choose your move! (only you can play)
- You already picked! Wait for your opponent.

Interactive prompts detected

- # <:Bullet1:1423202134601633913> Rock Paper Scissors Choose your move! (only you can play)
- Click **Next Round** to continue!

Operational notes

- Context/install restrictions are declared in the command decorators.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.

/fun tictactoe

Play Tic Tac Toe vs another user

Source	Fun.py:553 (tictactoe)
Output	Embed, View/buttons
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /fun tictactoe from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
opponent	discord.Member	Yes	No decorator description exposed.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] You can't play against bots!
- [Error] You can't play against yourself!
- This spot is already taken!

Operational notes

- Context/install restrictions are declared in the command decorators.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/fun wyr

Would you rather...? Vote and see the crowd favorite!

Source	Fun.py:707 (wyr)
Output	View/buttons
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /fun wyr from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/quote

Get a random quote or specific quote

Source	Quote.py:306 (quote)
Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True)

Usage

Run /quote from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
number	int	No	Specific quote number Default: None.
custom	str	No	Create a custom quote Default: None.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] No quotes available.
- [Error] Quote number out of range.
- [Error] Quote number must be a whole number.

Operational notes

- Context/install restrictions are declared in the command decorators.

/quotes add

Add a custom quote to this server

Source	Quote.py:225 (add)
Output	Text or standard interaction response

Usage

Run /quotes add from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
field	str	Yes	Quote text
author	str	No	Author of the quote (optional) Default: None.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Operational notes

- Premium status or premium limits are referenced in this command path.

/quotes list

List this server's custom quotes

Source	Quote.py:124 (list_quotes)
Output	Embed, View/buttons

Usage

Run /quotes list from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] No custom quotes saved.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/quotes my

Custom quote of your premium server

Source	Quote.py:84 (myserver)
Output	Text or standard interaction response

Usage

Run /quotes my from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
number	int	No	Specific quote number (optional) Default: None.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- Custom quote of your premium server
- [Error] No custom quotes available for this server.
- [Error] Quote number out of range.

Operational notes

- Premium status or premium limits are referenced in this command path.

/quotes remove

Remove a custom quote from this server

Source	Quote.py:254 (remove)
Output	Text or standard interaction response

Usage

Run /quotes remove from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
number	int	Yes	Quote number to remove

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- [Error] No custom quotes available.
- [Error] Invalid serial number.

Operational notes

- Premium status or premium limits are referenced in this command path.

Giveaways

/giveaway create

Setup a brand new giveaway

Source	Giveaways.py:533 (setup_giveaway)
Output	Embed, View/buttons

Usage

Run /giveaway create from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If giveaway posting fails, verify duration/prize inputs and channel send permissions.

Interactive prompts detected

- Please configure the giveaway by clicking the buttons below.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/giveaway fast

Quickly start a giveaway in this channel

Source	Giveaways.py:546 (fast_giveaway)
Output	Text or standard interaction response

Usage

Run /giveaway fast from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
price	Optional[str]	No	Prize for the giveaway Default: None.
duration	Optional[str]	No	Duration (e.g., 1h, 30m, 1d) Default: None.

Possible issues, errors, and fixes

- If giveaway posting fails, verify duration/prize inputs and channel send permissions.

Visible error / guard messages in code

- [Error] Giveaways can only be started inside a server text channel.
- [Error] Invalid duration.
- <:Timeout:1423186126109282344> Timed out.

Interactive prompts detected

- # Please type the giveaway prize.
- # Prize registered. Now type the duration (e.g., 1h, 30m, 1d).

Operational notes

- No special operational path was detected beyond the slash command itself.

Messaging & Automation

/direct message

Send a direct message through the bot

Source	CC'ed.py:101 (direct_message)
Output	Text or standard interaction response

Usage

Run /direct message from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.User	Yes	The user who should receive the message

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] Direct message cancelled because the message was empty.
- [Error] Direct message cancelled because Discord messages cannot be longer than 2000 characters.
- [Error] Direct message cancelled because no message was typed in time.
- [Error] Unable to send message. The user may have DMs disabled.
- [Error] Unable to send message.

Interactive prompts detected

- # <:Verified:1419186539098800250> Type the message in this channel. I will delete it and send it to
- # <:Error:1423194250203365458> Direct message cancelled because no message was typed in time.

Operational notes

- No special operational path was detected beyond the slash command itself.

/direct receive

Receive the full direct message transcript with a user

Source	CC'ed.py:164 (direct_receive)
Output	File

Usage

Run /direct receive from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.User	Yes	The user whose transcript should be fetched

Possible issues, errors, and fixes

- If file upload fails, check file size, attachment permissions, and whether Discord is rate-limiting the channel.

Visible error / guard messages in code

- [Error] No message history found.
- [Error] Unable to access DMs. No messages found or no permission.
- [Error] Unable to generate transcript.

Operational notes

- May upload or return a file attachment.

/dropdown embed

Setup a common FAQ-style embed (Admins Only)

Source	Dropown.py:304 (setup_common)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run /dropdown embed from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- Setup a common FAQ-style embed (Admins Only)

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/embed build

Create and save a embed message template

Source	Embed.py:704 (build)
Output	View/buttons
Checks	has_permissions(administrator=True)

Usage

Run /embed build from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.

/embed delete

Remove one of your saved messages

Source	Embed.py:857 (delete)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /embed delete from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
save_name	str	No	Pick a saved message to remove Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- [Error] No saved messages found.
- [Error] Save not found.
- [Error] Invalid selection.
- [Error] Timed out or invalid input.

Interactive prompts detected

- ### <:Bullet1:1423202134601633913> Select a message to delete:
- Type the number below.
- # <:Error:1423194250203365458> Invalid selection.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/embed repeat

Send a saved message from this server repeatedly at an interval

Source	Embed.py:958 (repeat)
Output	View/buttons

Checks	has_permissions(administrator=True)
---------------	-------------------------------------

Usage

Run /embed repeat from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
duration	str	No	Interval between sends (e.g. 10m, 1h, 1d) Default: None.
channel	discord.TextChannel	No	Channel to repeat in Default: None.
save_name	str	No	Saved message to repeat Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] Invalid duration. Use like `10m`, `1h`, or `1d`.
- [Error] Duration must be between 1 minute and 1 day.
- [Error] This channel already has an active repeating message.
- [Error] Save not found.

Interactive prompts detected

- ### <:Bullet1:1423202134601633913> Multiple saved messages match that name. Select the one to repeat:

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.

/embed retriive

Send a saved message from this server here

Source	Embed.py:749 (retriive)
Output	Webhook
Checks	has_permissions(administrator=True)

Usage

Run /embed retriive from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
save_name	str	No	Pick a saved message to send Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.

- If webhook creation or sending fails, check Manage Webhooks permission and confirm the target channel still exists.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- [Error] No saved messages found in this server.
- [Error] Save not found.
- [Error] Failed to send via webhook:

Interactive prompts detected

- ### <:Bullet1:1423202134601633913> Select a message to send:
- ### <:Bullet1:1423202134601633913> Multiple saved messages match that name. Select the one to send:

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Uses or manages webhooks; bot/channel webhook permissions matter.

/embed stoprepeat

Stop all repeating messages in this server

Source	Embed.py:1034 (stop_repeat)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /embed stoprepeat from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- [Error] All repeating messages in this server have been stopped.
- [OK] No active repeating messages.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/forum

Create a customized forum for your server.

Source	Forum.py:455 (setup_forum)
Output	View/buttons
Checks	has_permissions(administrator=True)

Usage

Run `/forum` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
model	str	Yes	Choose the model for your form

Choices

model: Direct Message (dm); Discord Form (discord)

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] This server already has **

Interactive prompts detected

- Choose the model for your form
- # <:Quote:1423184590725451776> Click the buttons below to configure your form:

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Premium status or premium limits are referenced in this command path.

/npc activate

Activate an NPC or NPC Group

Source	Npc.py:622 (npc_activate)
Output	Webhook
Checks	has_permissions(administrator=True)

Usage

Run `/npc activate` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
type	Optional[Literal['individual', 'groups']]	No	Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If webhook creation or sending fails, check Manage Webhooks permission and confirm the target channel still exists.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- NPCs can only be activated in regular text channels.
- I need View Channel, Send Messages, and Manage Webhooks in this channel to activate NPCs.
- No NPCs or NPC Groups found for this server.
- Invalid selection.
- [NPC] Error creating webhook for individual activate:
- I couldn't create the NPC webhook here. Check my Manage Webhooks permission and try a smaller avatar image.
- [NPC] Error creating webhook for group activate:
- I couldn't create the NPC group webhook here. Check my Manage Webhooks permission and try again.

Interactive prompts detected

- Choose an NPC to activate by sending its number:
- Timed out selection.
- Invalid selection.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Uses or manages webhooks; bot/channel webhook permissions matter.

/npc create

Create a new NPC or NPC Group

Source	Npc.py:582 (npc_create)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run /npc create from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- Premium limits active.
- Free limits active. Premium allows up to 10 of each type.

Interactive prompts detected

- Free limits active. Premium allows up to 10 of each type.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/npc deactivate

Deactivate active NPCs in this channel

Source	Npc.py:806 (npc_deactivate)
Output	Webhook
Checks	has_permissions(administrator=True)

Usage

Run /npc deactivate from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If webhook creation or sending fails, check Manage Webhooks permission and confirm the target channel still exists.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Uses or manages webhooks; bot/channel webhook permissions matter.

/npc delete

Delete an NPC or NPC Group completely

Source	Npc.py:737 (npc_delete)
Output	Webhook
Checks	has_permissions(administrator=True)

Usage

Run /npc delete from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If webhook creation or sending fails, check Manage Webhooks permission and confirm the target channel still exists.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- No NPCs found in this server.
- NPC not found when deleting.

- Invalid selection.

Interactive prompts detected

- Choose an NPC to delete (send number):
- Timed out selection.
- Invalid selection.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Uses or manages webhooks; bot/channel webhook permissions matter.

/webhook

Send webhook messages or open the Discord editor

Source	Webhooks.py:881 (webhook)
Output	Embed, View/buttons, Webhook
Checks	has_permissions(administrator=True)

Usage

Run /webhook from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If webhook creation or sending fails, check Manage Webhooks permission and confirm the target channel still exists.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- Build webhook messages, Components V2 layouts, action buttons, and role dropdowns in the browser — or use the built-in **Discord Editor** right here **(Premium servers only)**.
- <:Premium:1423172345778016367> Discord Editor

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Uses or manages webhooks; bot/channel webhook permissions matter.
- Premium status or premium limits are referenced in this command path.

Moderation

/automod

Setup AutoMod in your server

Source	Automod.py:328 (automod)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run /automod from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- <:Premium:1423172345778016367> **Premium** — choose **any channels you want** for each module.
- ■ **Free Tier** — up to **15 distinct channels** across all channel-based modules. Use </premium:1490606512757018665> to unlock more.

Interactive prompts detected

- <:Premium:1423172345778016367> **Premium** — choose **any channels you want** for each module.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/blacklist kick

Kick a user (without blacklisting them)

Source	Blacklists.py:194 (blacklist_kick)
Output	Text or standard interaction response
Checks	has_permissions(kick_members=True)

Usage

Run /blacklist kick from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	The user to kick
reason	str	No	Optional reason for kick Default: 'No reason provided'.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.

Visible error / guard messages in code

- No reason provided
- [Error] You can't action this user, higher in hierarchy than you!
- [Error] I don't have permission to kick this user.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/blacklist list

List all blacklisted users in this server

Source	Blacklists.py:155 (blacklist_list)
Output	Embed, View/buttons

Usage

Run /blacklist list from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [OK] No users are currently blacklisted in this server.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/blacklist remove

Remove a user from blacklist

Source	Blacklists.py:275 (blacklist_remove)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /blacklist remove from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.User	Yes	The user to remove from blacklist
reason	str	No	Optional reason for removal Default: 'No reason provided'.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- No reason provided
- [Error] This user is not blacklisted.
- [Error] You can't action this user, higher in hierachy than you!
- [Error] I don't have permission to kick this user.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/blacklist timeout

Timeout a user without blacklisting them

Source	Blacklists.py:229 (blacklist_timeout)
Output	Text or standard interaction response
Checks	has_permissions(moderate_members=True)

Usage

Run /blacklist timeout from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	The user to timeout
time	str	No	Optional duration like 10m, 1h, or 2d. Defaults to 1h Default: None.
reason	str	No	Optional reason for timeout Default: 'No reason provided'.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.

Visible error / guard messages in code

- No reason provided
- Timeout a user without blacklisting them
- The user to timeout
- Optional reason for timeout
- [Error] Invalid timeout duration. Use something like `10m`, `1h`, or `2d`.
- [Error] Timeout duration cannot be longer than 28 days.
- [Error] You can't action this user, higher in hierachy than you!

- [Error] I don't have permission to timeout this user.
- [Error] I need Moderate Members permission to timeout users.
- [Error] Failed to timeout this user.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/blacklist user

Blacklist a user (kicks and prevents rejoin)

Source	Blacklists.py:110 (blacklist_user)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /blacklist user from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	The user to blacklist
reason	str	No	Optional reason for blacklist Default: 'No reason provided'.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- No reason provided
- [Error] You can't action this user, higher in hierarchy than you!
- [Error] I don't have permission to kick this user.
- [Error] This user is already blacklisted.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/clean

Wipes Each and Every message in the channel (Admins Only).

Source	Clean.py:14 (clean)
Output	Text or standard interaction response

Usage

Run /clean from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- Wipes Each and Every message in the channel (Admins Only).
- [Error] Discord rejected this channel clean.
- [Error] You must be an **Administrator** to use this command.
- [Error] This command only works in regular text channels.
- [Error] I need `Manage Channels` permission to do this.
- [Error] Discord requires this channel for the Community server, so I can't clean it by deleting/recreating it.
- Rolling back failed channel clean

Interactive prompts detected

- `-# <:WIP:1423198102994812960>` Cleaning this channel... Please wait...

Operational notes

- No special operational path was detected beyond the slash command itself.

/editsnipe

Show the most recently edited message in this channel.

Source	Utility.py:683 (editsnipe)
Output	Embed

Usage

Run /editsnipe from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- `*No text content*`

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/lock

Lock the current channel for everyone.

Source	Utility.py:510 (lock)
Output	Embed
Checks	has_permissions(manage_channels=True)

Usage

Run /lock from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If channel edits fail, check Manage Channels permission and channel overwrite hierarchy.

Visible error / guard messages in code

- ** has been locked. Only users with explicit permission can view or send messages.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.

/purge

Delete a specified number of messages from this channel.

Source	Utility.py:415 (clear)
Output	Embed

Usage

Run /purge from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
amount	int	Yes	Number of messages to delete (max 5000).

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- [Error] You lack permission to delete messages.
- [Error] Please provide a valid number greater than 0.
- [Error] Only premium servers can purge beyond 1000 messages. Use </premium:1490606512757018665>.

Interactive prompts detected

- -# <:Error:1423194250203365458> Please provide a valid number greater than 0.

Operational notes

- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/snipe

Show the last deleted message in this channel.

Source	Utility.py:659 (snipe)
Output	Embed

Usage

Run /snipe from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- *No text content*

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/unlock

Unlock the current channel for everyone.

Source	Utility.py:531 (unlock)
Output	Embed
Checks	has_permissions(manage_channels=True)

Usage

Run /unlock from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If channel edits fail, check Manage Channels permission and channel overwrite hierarchy.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.

Other Commands

/log channel

Set the server log channel.

Source	Log.py:155 (log_channel)
Output	Embed
Checks	has_permissions(administrator=True)

Usage

Run /log channel from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
channel	discord.TextChannel	Yes	Channel where server logs should be sent

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- The Secretary will now send server activity logs only to the configured channel.
- [Error] This command can only be used in a server.
- [Error] I need Send Messages and Embed Links in that log channel.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/log stop

Stop server logging and remove the saved log channel.

Source	Log.py:200 (log_stop)
Output	Embed
Checks	has_permissions(administrator=True)

Usage

Run /log stop from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.

- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- The Secretary will no longer send server activity logs for this server.
- [Error] This command can only be used in a server.
- No saved log channel configuration was found.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/slowmode

Set or remove slowmode in the current channel.

Source	Utility.py:555 (slowmode)
Output	Embed
Checks	has_permissions(manage_channels=True)

Usage

Run /slowmode from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
duration	str	No	Duration like 10s, 5m, 1h. Leave empty to remove slowmode. Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If channel edits fail, check Manage Channels permission and channel overwrite hierarchy.

Visible error / guard messages in code

- [Error] Invalid slowmode duration. Use `10s`, `5m`, `1h`, seconds, or leave empty to remove.
- [Error] I don't have permission to edit this channel.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.

Reports & Documents

/report gen

Generate a formal report.

Source	Reports.py:127 (report_gen)
Output	Embed, View/buttons, Modal

Usage

Run /report gen from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
submitting_office	discord.TextChannel	No	Default: None.
pings	str	No	Default: None.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

Restricted / Owner

/debug grant

Debug server sync and premium issues

Source	Debug.py:16 (grant_role)
Output	Text or standard interaction response

Usage

Run /debug grant from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
role	discord.Role	Yes	Grant server sync api key

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- Debug server sync and premium issues
- [Error] Debugs are handled externally, no need to bother.
- [Error] This command can only be used in a server.
- [Error] I cannot give you this role (it's higher than my role).
- [Error] You already have this role.
- [Error] I lack permissions to assign this role.
- [Error] Unexpected error:

Operational notes

- No special operational path was detected beyond the slash command itself.

/debug revoke

Debug server sync and premium issues

Source	Debug.py:65 (revoke_role)
Output	Text or standard interaction response

Usage

Run /debug revoke from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
role	discord.Role	Yes	Remove server sync api key from database

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- Debug server sync and premium issues
- [Error] Debugs are handled externally, no need to bother.
- [Error] This command can only be used in a server.
- [Error] You don't have this role.
- [Error] Failed to remove role.
- [Error] Unexpected error:

Operational notes

- No special operational path was detected beyond the slash command itself.

/engine blacklist

Add/Remove servers from the blacklist (bot cannot join)

Source	Engine.py:938 (blacklist)
Output	Text or standard interaction response

Usage

Run /engine blacklist from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
action	str	Yes	Choose add or remove
server_id	str	Yes	ID of the server to add/remove

Choices

action: Add (add); Remove (remove)

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- Add/Remove servers from the blacklist (bot cannot join)
- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] This server is already blacklisted.
- [Error] Server `
- [Error] This server is not blacklisted.

Interactive prompts detected

- Choose add or remove
- Please choose either `add` or `remove`.

Operational notes

- No special operational path was detected beyond the slash command itself.

/engine commands

Inspect registered commands and descriptions

Source	Engine.py:1455 (command_index)
Output	Embed, View/buttons

Usage

Run `/engine` commands from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
command	str	No	Specific command to inspect Default: None.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] No registered commands were found.
- [Error] Command `/
- ` was not found.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/engine console

Download the full bot console log

Source	Engine.py:1188 (console)
Output	File

Usage

Run `/engine console` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If file upload fails, check file size, attachment permissions, and whether Discord is rate-limiting the channel.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] Log file not found.
- [Error] Log file is too large to send (over 25MB).
- [Error] Failed to send log file: ``

Operational notes

- May upload or return a file attachment.

/engine economy

Add cash to a user's economy account

Source	Engine.py:1594 (economy_inject)
Output	Text or standard interaction response

Usage

Run /engine economy from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user_id	str	Yes	The user ID of the economy account
amount	int	Yes	Amount of cash to add

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] Invalid user ID. Must be a numeric value.
- [Error] No economy account found for user ID `

Operational notes

- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/engine gloabalaccounts

Global economy account database of The Secretary

Source	Engine.py:1497 (global_accounts_manifest)
Output	Embed, View/buttons

Usage

Run /engine gloabalaccounts from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/engine leave

Remove The Secretary from a particular server using Guild ID

Source	Engine.py:907 (desert)
Output	Text or standard interaction response

Usage

Run /engine leave from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
server_id	str	Yes	ID of the server to leave
reason	str	Yes	Reason The Secretary is leaving the server

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] Bot is not in that server.

Operational notes

- No special operational path was detected beyond the slash command itself.

/engine memory

Trigger an immediate database cleanup sweep

Source	Engine.py:1638 (memory)
Output	Webhook

Usage

Run /engine memory from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If webhook creation or sending fails, check Manage Webhooks permission and confirm the target channel still exists.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] Cleanup cog is not loaded.
- [Error] Sweep encountered an error: ``

Operational notes

- Uses or manages webhooks; bot/channel webhook permissions matter.

/engine message

Send messages or fetch transcripts sent or received by the bot

Source	Engine.py:1234 (msg_behalf)
Output	Modal

Usage

Run /engine message from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
action	str	Yes	Select the action to perform

Choices

action: Send Message (send_message); Receive Transcript (receive_transcript); Receive Intel (receive_intel)

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] Invalid action value.

Interactive prompts detected

- Select the action to perform

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.

/engine premiumgrant

Grant premium to a server after purchase

Source	Engine.py:976 (premium_grant)
Output	Text or standard interaction response

Usage

Run /engine premiumgrant from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
server_id	str	Yes	No decorator description exposed.
end_date	str	No	Default: None.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- premiumgrant

- Grant premium to a server after purchase
- [Error] Only Registered Developers can use this Command.
- [OK] Premium granted to `
- [Error] Invalid date format. Use DD/MM/YYYY

Operational notes

- Premium status or premium limits are referenced in this command path.

/engine premiumrevoke

Revoke premium from a server due to early problems

Source	Engine.py:1028 (premium_revoke)
Output	Text or standard interaction response

Usage

Run /engine premiumrevoke from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
server_id	str	Yes	No decorator description exposed.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- premiumrevoke
- Revoke premium from a server due to early problems
- [Error] Only Registered Developers can use this Command.
- [Error] That server does not have premium.
- <:Emergency:1423187435549888542> Premium revoked for `

Operational notes

- Premium status or premium limits are referenced in this command path.

/engine premiums

Active Premium Server Database of The Secretary

Source	Engine.py:1375 (premium_manifest)
Output	Text or standard interaction response

Usage

Run /engine premiums from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- No invite lookup
- premiums
- Active Premium Server Database of The Secretary
- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- Bot lacks Manage Server permission
- No permission
- Invite creation failed
- premium_end
- No channel to create invite
- Premium server manifest request

Operational notes

- Premium status or premium limits are referenced in this command path.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/engine publish

Publish a message to all community servers

Source	Engine.py:1053 (publish)
Output	File

Usage

Run /engine publish from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
message_link	str	Yes	No decorator description exposed.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If file upload fails, check file size, attachment permissions, and whether Discord is rate-limiting the channel.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] Invalid message link.
- ` [Error] Skipped: `
- ` <:Emergency:1423187435549888542> Failed: `
- [Error] Failed to fetch message. `
-) - No Community
-) - No Updates Channel
-) - No Permission

Operational notes

- May upload or return a file attachment.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/engine servers

Total Server Database of The Secretary

Source	Engine.py:1313 (server_manifest)
Output	Text or standard interaction response

Usage

Run /engine servers from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- No invite lookup
- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- Bot lacks Manage Server permission
- No permission
- Invite creation failed
- No channel to create invite

Operational notes

- No special operational path was detected beyond the slash command itself.

/engine sync

Reload The Secretary Command Panel

Source	Engine.py:846 (reload_all)
Output	Text or standard interaction response

Usage

Run /engine sync from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- No logs available.
- [Error] Failed:

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] Sync crashed: ``

Interactive prompts detected

- # <:WIP:1423198102994812960> Sync in progress... please wait.

Operational notes

- No special operational path was detected beyond the slash command itself.

/engine topgg

Update Top.gg stats

Source	Engine.py:1149 (topgg)
Output	Text or standard interaction response

Usage

Run /engine topgg from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- <:Owner:1419208982236495902> Only Registered Developers can use this Command.
- [Error] **Top.gg Update Failed** ``

Interactive prompts detected

- Content-Type

Operational notes

- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

Role Management

/bulk

Bulk create or remove roles

Source	Bulk.py:57 (bulk)
Output	Embed, View/buttons

Usage

Run /bulk from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
action	str	No	Select bulk action Default: None.

Choices

action: Remove Roles (remove); Create Roles (create)

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] You must be an **Administrator** to use this command.
- Invalid action.

Interactive prompts detected

- Select bulk action
- Select what you want to do:

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/role add

Add a role to yourself or another member

Source	Rolls.py:450 (role_add)
Output	Text or standard interaction response

Usage

Run /role add from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
role	str	Yes	Role to add. Accepts role mention, ID, or plain role name.

Name	Type	Required	Description / Default
user	Optional[discord.Member]	No	Optional member to receive the role. Defaults to you. Default: None.

Possible issues, errors, and fixes

- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- [Error] This command can only be used inside a server.
- [Error] I couldn't find a matching role. Use a role mention, role ID, or part of the role name.
- [Error]
- already has
- [Error] Discord blocked the role update because of permissions or hierarchy.
- [Error] Failed to add role:

Interactive prompts detected

- Role to add. Accepts role mention, ID, or plain role name.
- -# <:Error:1423194250203365458> I couldn't find a matching role. Use a role mention, role ID, or part of the role name.

Operational notes

- No special operational path was detected beyond the slash command itself.

/role all

Give mentioned role to all members including bots

Source	Rolls.py:430 (roll_all)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /role all from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
role	discord.Role	Yes	Role to assign

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Interactive prompts detected

- Give mentioned role to all members including bots

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/role autoroleadd

Add role to autorole list

Source	Rolls.py:912 (add_autoroll)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /role autoroleadd from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
target_type	app_commands.Choice[str]	Yes	Member/Bot
role	discord.Role	Yes	Role to assign

Choices

target_type: Member (member); Bot (bot)

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- [Error] Invalid autorole target. Use `Member` or `Bot`.
- [Error] Role
- already in autorole.
- [Error] You can only have up to **

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/role autorolelist

List all autoroles

Source	Rolls.py:982 (list_autoroll)
Output	Embed
Checks	has_permissions(administrator=True)

Usage

Run /role autorolelist from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.

- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- [Error] No autoroles configured.
- No roles

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.

/role autoroleremove

Remove role from autorole list

Source	Rolls.py:953 (remove_autoroll)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /role autoroleremove from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
target_type	app_commands.Choice[str]	Yes	Member/Bot
role	discord.Role	Yes	Role to remove

Choices

target_type: Member (member); Bot (bot)

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- [Error] Invalid autorole target. Use `Member` or `Bot`.
- [Error] No autorole configured for
- [Error] Role

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/role bots

Give mentioned role to bots only

Source	Rolls.py:442 (roll_bots)
Output	Text or standard interaction response

Checks	has_permissions(administrator=True)
---------------	-------------------------------------

Usage

Run /role bots from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
role	discord.Role	Yes	Role to assign

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- Give mentioned role to bots only

Interactive prompts detected

- Give mentioned role to bots only

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/role info

Display information about a specific role.

Source	Rolls.py:1018 (roleinfo)
Output	Embed

Usage

Run /role info from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
role	discord.Role	Yes	No decorator description exposed.

Possible issues, errors, and fixes

- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- Permissions

Interactive prompts detected

- Mentionable

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/role list

List all roles in the server

Source	Rolls.py:364 (roll_list)
Output	Embed, View/buttons

Usage

Run /role list from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- No roles found.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/role members

Give mentioned role to members only

Source	Rolls.py:436 (roll_members)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /role members from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
role	discord.Role	Yes	Role to assign

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- Give mentioned role to members only

Interactive prompts detected

- Give mentioned role to members only

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/role reaction

Setup reaction roles

Source	Rolls.py:593 (roll_reaction)
Output	Embed
Checks	has_permissions(administrator=True)

Usage

Run /role reaction from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- [Error] No valid emoji-role lines found.
- <:Timeout:1423186126109282344> Timeout waiting for message link. Cancelled.
- [Error] Invalid message link format. Use a full Discord message link, or type `skip`.
- [Error] Please provide a message link from this server.
- [Error] Could not find that channel (I might not have access).

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.

/role remove

Remove a role from yourself or another member

Source	Rolls.py:522 (role_remove)
Output	Text or standard interaction response

Usage

Run `/role remove` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
role	str	Yes	Role to remove. Accepts role mention, ID, or plain role name.
user	Optional[discord.Member]	No	Optional member to remove the role from. Defaults to you. Default: None.

Possible issues, errors, and fixes

- If role assignment fails, move the bot role above the target role and check Manage Roles permission.

Visible error / guard messages in code

- [Error] This command can only be used inside a server.
- [Error] I couldn't find a matching role. Use a role mention, role ID, or part of the role name.
- [Error]
- [Error] Discord blocked the role update because of permissions or hierarchy.
- [Error] Failed to remove role:

Interactive prompts detected

- Role to remove. Accepts role mention, ID, or plain role name.
- -# <:Error:1423194250203365458> I couldn't find a matching role. Use a role mention, role ID, or part of the role name.

Operational notes

- No special operational path was detected beyond the slash command itself.

Server Tools

/tools capitalize

Capitalize channel names

Source	Tools.py:1153 (capitalize)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /tools capitalize from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
action_type	app_commands.Choice[str]	Yes	No decorator description exposed.
channel	discord.TextChannel	No	Optional target channel Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcetop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try </tools forcetop:1496750056714276975>
- [Error] Action cancelled.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools categoryclone

Clone a category with same perms and name (not channels)

Source	Tools.py:1222 (category_clone)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /tools categoryclone from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
category	str	Yes	The category to clone (ID or name)

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.

- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] Category not found. Provide a valid category ID or name.
- [Error] Action cancelled.
- [Error] Failed to clone category:

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools channel

Create a text channel

Source	Tools.py:1067 (create_channel)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /tools channel from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
name	str	Yes	Name of the channel to create

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Failed to create channel:

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools channelclone

Clone a channel with same perms and settings

Source	Tools.py:1194 (channel_clone)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /tools channelclone from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
channel	discord.TextChannel	Yes	The channel to clone

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] Action cancelled.
- [Error] Failed to clone channel:

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools copy

Copy the entire structure of this particular server

Source	Tools.py:1502 (copy_structure)
Output	Text or standard interaction response

Usage

Run /tools copy from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`

Operational notes

- No special operational path was detected beyond the slash command itself.

/tools deleteall

Delete all channels possible in the server

Source	Tools.py:1174 (clear_all)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /tools deleteall from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] Action cancelled.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools deletcategory

Delete a category and all the channels under the same

Source	Tools.py:1449 (delete_category)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /tools deletcategory from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
category	str	Yes	The category to delete (ID or name)

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] Category not found. Provide a valid category ID or name.
- [Error] Action cancelled.
- ** channels. [Error] Failed: **

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools deletechannels

Delete multiple mentioned channels at once

Source	Tools.py:1370 (delete_mass_channels)
Output	Text or standard interaction response

Checks	has_permissions(administrator=True)
---------------	-------------------------------------

Usage

Run `/tools deletechannels` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
channels	str	No	Mention channels in format #channel1 #channel2 ... (optional) Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] No valid channels found. Use channel mentions or IDs, one per line.
- [Error] Action cancelled.
- `** channels. [Error] Failed: **`
- [Error] Timed out.

Interactive prompts detected

- Delete multiple mentioned channels at once
- Mention channels in format #channel1 #channel2 ... (optional)
- `-# <:WIP:1423198102994812960> Please type all channels to delete, **one per line** (mention or ID), in this channel now. Your message will be deleted.`
- `-# <:Error:1423194250203365458> No valid channels found. Use channel mentions or IDs, one per line.`

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools emoji

Apply emoji model

Source	Tools.py:1107 (emoji)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run `/tools emoji` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
separator	str	Yes	Separator to use

Name	Type	Required	Description / Default
channel	discord.TextChannel	No	Optional target channel Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcetop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcetop:1496750056714276975>`
- [Error] Action cancelled.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools forcetop

Force stop all running toolkit processes for this server

Source	Tools.py:1685 (forcetop)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /tools forcetop from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcetop command before starting another large operation.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools movetocategory

Move multiple different channels to a single category

Source	Tools.py:1313 (move_to_category)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run /tools movetocategory from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
category	str	No	Target category ID or name (optional — leave blank to set via button) Default: None.
channels	str	No	Mention channels separated by spaces (optional — leave blank to set via button) Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] Category not found. Provide a valid category ID or name.
- [Error] No valid channels found in the channels field.
- [Error] Action cancelled.

Interactive prompts detected

- Mention channels separated by spaces (optional — leave blank to set via button)

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/tools paste

Paste the copied server structure

Source	Tools.py:1535 (paste_structure)
Output	Embed
Checks	has_permissions(administrator=True)

Usage

Run /tools paste from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- `<:Timeout:1423186126109282344>` Total Time
- [Error] Premium Only command please try `</premium:1490606512757018665>`

- [Error] You have not copied any structure yet.
- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] Paste cancelled.

Interactive prompts detected

- `-# <:Error:1423194250203365458>` Premium Only command please try `</premium:1490606512757018665>`

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/tools role

Create a role

Source	Tools.py:1086 (create_role)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run `/tools role` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
name	str	Yes	Name of the role to create

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If role assignment fails, move the bot role above the target role and check Manage Roles permission.
- If server-tool operations stall, use the toolkit `stop/forcestop` command before starting another large operation.

Visible error / guard messages in code

- [Error] Failed to create role:

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools sync

Sync category permissions to channels

Source	Tools.py:1255 (sync)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run `/tools sync` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
category	str	No	Optional category to sync permissions from (ID or name) Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit `stop/forcestop` command before starting another large operation.

Visible error / guard messages in code

- Sync category permissions to channels
- Optional category to sync permissions from (ID or name)
- Sync category permissions from `**`
- Sync permissions for `**all categories**`? Affected channels:
- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] Action cancelled.
- [OK] Synced permissions to `**`
- `**` channels. [Error] Failed: `**`
- [Error] Category not found. Provide a valid category ID or name.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/tools template

Apply a server template from template library

Source	Tools.py:1634 (template)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run `/tools template` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
theme	str	No	Optional theme name (leave empty to browse all templates) Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If a premium gate appears, verify the server premium record and plan limits before retrying.

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`
- [Error] Template not found.
- [Error] This is a Premium Template. Please try `</premium:1490606512757018665>`
- [Error] This template needs Discord Community features. Enable Community for this server in Server Settings, then try again.
- [Error] Action cancelled.
- premium_templates

Interactive prompts detected

- `-# <:Error:1423194250203365458>` This is a Premium Template. Please try `</premium:1490606512757018665>`

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/tools wrap

Wrap channel names with begin and end strings

Source	Tools.py:1127 (wrap)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /tools wrap from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
begin	str	Yes	Begin string
end	str	Yes	End string
channel	discord.TextChannel	No	Optional target channel Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If server-tool operations stall, use the toolkit stop/forcestop command before starting another large operation.

Visible error / guard messages in code

- [Error] Another toolkit operation is running. Try `</tools forcestop:1496750056714276975>`

- [Error] Action cancelled.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

Staff & Operations

/callout create

Create a callout in this channel

Source	Callout.py:221 (create)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run /callout create from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
roles	str	No	Roles to ping (mention them, e.g. @Role1 @Role2, optional) Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Interactive prompts detected

- Roles to ping (mention them, e.g. @Role1 @Role2, optional)

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/callout forceend

Force end callouts

Source	Callout.py:252 (forceend)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run /callout forceend from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

/callout responders

View active callout responders

Source	Callout.py:234 (responding_units)
Output	Embed
Checks	has_permissions(administrator=True)

Usage

Run /callout responders from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- [Error] No active callout.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.

/loa

Configure a formal Leave of Absence system in your server

Source	Loa.py:164 (setup_loa)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run /loa from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Interactive prompts detected

- Configure all fields below by clicking buttons.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/staff demotion

Demote a staff member (assign demoted role, remove old role optional)

Source	Staff.py:612 (staff_demotion)
Output	Embed

Usage

Run /staff demotion from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	User to demote
demoted_role	Optional[discord.Role]	No	Role to give (mention) Default: None.
old_role	Optional[discord.Role]	No	Old role to remove (optional, mention) Default: None.
reason	Optional[str]	No	Optional reason Default: None.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- Action Forbidden
- [Error] You can only manage roles below your highest role.
- [Error] You can only grant roles below your highest role.

Interactive prompts detected

- Role to give (mention)
- Old role to remove (optional, mention)

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/staff embed

Create a custom staff duty embed with On/Off Duty buttons

Source	Staff.py:692 (staff_embed)
Output	Embed, View/buttons

Usage

Run `/staff embed` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
title	Optional[str]	No	Title of the embed Default: None.
description	Optional[str]	No	Description for the embed Default: None.
channel	Optional[discord.TextChannel]	No	Channel where to send the embed Default: None.
thumbnail	Optional[str]	No	Optional thumbnail image URL Default: None.
image	Optional[str]	No	Optional image URL Default: None.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/staff infraction

Apply an infraction to a staff member (add infraction role / remove roles)

Source	Staff.py:461 (staff_infraction)
Output	Embed

Usage

Run `/staff infraction` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	User to action
infraction_role	Optional[discord.Role]	No	Optional role to add as infraction (mention) Default: None.
remove_roles	Optional[str]	No	Optional roles to remove (mention multiple separated by spaces or commas) Default: None.
reason	Optional[str]	No	Optional reason Default: None.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- Action Forbidden
- [Error] You can only grant roles below your highest role.
- [Error] You can only manage roles below your highest role.

Interactive prompts detected

- Optional role to add as infraction (mention)

- Optional roles to remove (mention multiple separated by spaces or commas)

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/staff leaderboard

Show staff leaderboard (all-time duty time)

Source	Staff.py:377 (staff_leaderboard)
Output	Embed, View/buttons

Usage

Run /staff leaderboard from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- No staff to display.
- <:Emergency:1423187435549888542> No staff registered yet.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/staff manage

Manage a staff profile (On/Off Duty buttons)

Source	Staff.py:339 (staff_manage)
Output	Embed, View/buttons

Usage

Run /staff manage from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] You are not registered as staff.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.

- Still sends classic Discord embeds for at least part of its output.

/staff promotion

Promote a staff member (assign promoted role, remove old role optional)

Source	Staff.py:533 (staff_promotion)
Output	Embed

Usage

Run /staff promotion from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	User to promote
promoted_role	Optional[discord.Role]	No	Role to give (mention) Default: None.
old_role	Optional[discord.Role]	No	Old role to remove (optional, mention) Default: None.
reason	Optional[str]	No	Optional reason Default: None.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- Action Forbidden
- [Error] You can only manage roles below your highest role.
- [Error] You can only grant roles below your highest role.

Interactive prompts detected

- Role to give (mention)
- Old role to remove (optional, mention)

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/staff register

Register a user as staff

Source	Staff.py:260 (staff_register)
Output	Embed

Usage

Run /staff register from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	User to register

Name	Type	Required	Description / Default
roles	Optional[str]	No	Mention one or more roles to assign (e.g. @Role1 @Role2) Default: None.
rank	Optional[str]	No	Staff rank (e.g., Sergeant) Default: None.
callsign	Optional[str]	No	Optional callsign for nickname Default: None.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Interactive prompts detected

- Mention one or more roles to assign (e.g. @Role1 @Role2)

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/staff remove

Remove a staff member

Source	Staff.py:316 (staff_remove)
Output	Embed
Checks	has_permissions(administrator=True)

Usage

Run /staff remove from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	No decorator description exposed.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- [Error] That user isn't registered.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.

Tickets

/ticket add

Add a user to the current ticket

Source	Tickets.py:1767 (add)
Output	File

Usage

Run /ticket add from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	The user to add to this ticket

Possible issues, errors, and fixes

- If file upload fails, check file size, attachment permissions, and whether Discord is rate-limiting the channel.
- If ticket creation fails, check category/channel permissions, configured staff roles, and ticket limits.

Visible error / guard messages in code

- [Error] This command can only be used in a server ticket channel.
- [Error] This command can only be used inside an active ticket.
- [Error] Ticket configuration not found for this channel.
- [Error] You aren't authorized to add users to this ticket.
- [Error] I do not have permission to update this ticket channel.
- [Error] Failed to add that user to this ticket.

Operational notes

- May upload or return a file attachment.

/ticket close

Close all tickets opened by you or a selected user

Source	Tickets.py:1808 (close)
Output	Text or standard interaction response

Usage

Run /ticket close from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	Optional[discord.Member]	No	User whose tickets should be closed Default: None.

Possible issues, errors, and fixes

- If ticket creation fails, check category/channel permissions, configured staff roles, and ticket limits.

Visible error / guard messages in code

- [Error] This command can only be used in a server.
- [Error] Only administrators can close tickets for another user.
- [Error] No open tickets found for

Interactive prompts detected

- Close all tickets opened by you or a selected user

Operational notes

- No special operational path was detected beyond the slash command itself.

/ticket complex

Interactive setup for complex ticket types (Admins Only)

Source	Tickets.py:1870 (complex)
Output	Embed, View/buttons

Usage

Run /ticket complex from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If ticket creation fails, check category/channel permissions, configured staff roles, and ticket limits.

Visible error / guard messages in code

- Interactive setup for complex ticket types (Admins Only)
- [Error] You must be an **Administrator** to use this command.

Interactive prompts detected

- Interactive setup for complex ticket types (Admins Only)
- complex_type

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/ticket send

Send a ticket panel embed (with dropdown) using saved types (Admins Only)

Source	Tickets.py:1892 (c_send_embed)
Output	Embed, View/buttons

Usage

Run /ticket send from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If ticket creation fails, check category/channel permissions, configured staff roles, and ticket limits.

Visible error / guard messages in code

- Send a ticket panel embed (with dropdown) using saved types (Admins Only)
- [Error] You must be an **Administrator** to use this command.
- No ticket types found. Use `/ticket complex` to add types first.
- [Error] This server already has

Interactive prompts detected

- Send a ticket panel embed (with dropdown) using saved types (Admins Only)
- -# No ticket types found. Use `/ticket complex` to add types first.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/ticket simple

Interactive simple ticket setup (Admins Only)

Source	Tickets.py:1845 (simple)
Output	Embed, View/buttons

Usage

Run /ticket simple from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If ticket creation fails, check category/channel permissions, configured staff roles, and ticket limits.

Visible error / guard messages in code

- Interactive simple ticket setup (Admins Only)
- [Error] You must be an **Administrator** to use this command.

Operational notes

- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

Utility

/afk

Set or remove AFK status.

Source	AFK.py:37 (afk)
Output	Text or standard interaction response
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /afk from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
time	str	No	Duration (e.g. 30m, 1h, 2h30m) Default: None.
message	str	No	Optional reason for AFK Default: None.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.

Visible error / guard messages in code

- [Error] Invalid time format. Use `30m`, `1h`, `2h30m`, etc.
- [Error] I don't have permission to send messages.
- [AFK command] Unexpected error:
- [Error] Failed to set AFK:
- [Error] Unexpected error:

Operational notes

- Context/install restrictions are declared in the command decorators.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/avatar

Show the avatar of a user.

Source	Utility.py:282 (avatar)
Output	Components V2
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /avatar from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.User	No	Default: None.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If no image appears, the user may not have that asset or Discord may not expose it in the current context.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Uses Components V2 payloads for the user-facing Discord response.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/banner

Show the banner of a user.

Source	Utility.py:351 (banner)
Output	Components V2
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run `/banner` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.User	No	Default: None.

Possible issues, errors, and fixes

- If saved data is missing, rerun the setup command for that system or remove stale configuration entries.
- If no image appears, the user may not have that asset or Discord may not expose it in the current context.

Visible error / guard messages in code

- [Error] The user does not have a banner, it requires nitro.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Uses Components V2 payloads for the user-facing Discord response.
- Reads or writes saved configuration/state; stale or missing saved data can affect behavior.

/counter

Create a live counter channel.

Source	Counter.py:310 (counter)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run `/counter` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
prefix	Optional[str]	No	Static prefix for the counter (optional) Default: None.
type	Optional[Literal['members_and_bots', 'members_only', 'bots_only', 'banned_members', 'pending_members', 'members_with_certain_roles', 'roles_in_the_server', 'members_without_roles', 'online_with_certain_roles', 'offline_with_certain_roles', 'online_members_(incl_bots)', 'offline_members_(incl_bots)']]	No	Type of counter to track (optional) Default: None.
role	Optional[discord.Role]	No	Role (optional) Default: None.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If a premium gate appears, verify the server premium record and plan limits before retrying.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.

Visible error / guard messages in code

- [Error] This is a premium feature. Try `</premium:1490606512757018665>`
- `members_only`
- `bots_only`

Interactive prompts detected

- Type of counter to track (optional)

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/member count

Show total members, humans, and bots count.

Source	Utility.py:817 (count)
Output	Embed

Usage

Run `/member count` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/member info

Download a text file of all server members and their join details.

Source	Utility.py:852 (info)
Output	File

Usage

Run /member info from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If file upload fails, check file size, attachment permissions, and whether Discord is rate-limiting the channel.

Operational notes

- May upload or return a file attachment.

/member new

Show the 10 most recently joined members.

Source	Utility.py:872 (new)
Output	Embed

Usage

Run /member new from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- No data found.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

/member old

Show the 10 oldest members by join date.

Source	Utility.py:902 (old)
Output	Embed

Usage

Run `/member old` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- No data found.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

`/member young`

Show 10 members with the newest Discord accounts.

Source	Utility.py:931 (young)
Output	Embed

Usage

Run `/member young` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- No data found.

Operational notes

- Still sends classic Discord embeds for at least part of its output.

`/nickname`

Change your nickname or another member's nickname.

Source	Utility.py:587 (nickname)
Output	Text or standard interaction response

Usage

Run `/nickname` from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
name	str	Yes	New nickname
user	discord.Member	No	Optional member to rename. Defaults to you. Default: None.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] Nicknames can only be changed in a server.
- [Error] You need Manage Nicknames to rename other members.
- [Error] Please provide a nickname.
- [Error] Nicknames must be 32 characters or fewer.
- [Error] I can't change that nickname. Check my role position and permissions.

Interactive prompts detected

- -# <:Error:1423194250203365458> Please provide a nickname.

Operational notes

- No special operational path was detected beyond the slash command itself.

/remind

Set a reminder for yourself. Supports s/m/h/d.

Source	Utility.py:160 (remind)
Output	Embed
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /remind from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
time	str	No	Time like 10s, 5m, 2h, 1d Default: '1h'.
message	str	No	What to remind you about Default: 'You set a reminder!'.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] Invalid time format. Use examples like `10s`, `5m`, `2h`, or `1d`.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Still sends classic Discord embeds for at least part of its output.

/serverinfo

Display detailed information about the server.

Source	Utility.py:723 (serverinfo)
Output	Embed

Usage

Run /serverinfo from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

```
<:Premium:1423172345778016367> `
boosts <:Premium:1423172345778016367> Tier `
```

Operational notes

- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

/timestamp

Show the current UTC time in Discord timestamp format.

Source	Utility.py:631 (timestamp)
Output	Embed
Contexts	allowed_contexts(guilds=True, dms=True, private_channels=True); allowed_installs(guilds=True, users=True)

Usage

Run /timestamp from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Operational notes

- Context/install restrictions are declared in the command decorators.
- Still sends classic Discord embeds for at least part of its output.

/userinfo

Display detailed information about a user.

Source	Utility.py:208 (userinfo)
Output	Embed

Usage

Run /userinfo from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	No	Default: None.

Possible issues, errors, and fixes

- If a premium gate appears, verify the server premium record and plan limits before retrying.

Visible error / guard messages in code

- <:Timeout:1423186126109282344> Offline
- <:Premium:1423172345778016367> Idle

Operational notes

- Still sends classic Discord embeds for at least part of its output.
- Premium status or premium limits are referenced in this command path.

Welcome & Verification

/verification setup

Configure the verification system for this server

Source	Verification.py:620 (verification_setup)
Output	Embed, View/buttons
Checks	has_permissions(administrator=True)

Usage

Run /verification setup from Discord slash commands. The command opens an interactive flow after launch.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If buttons/modals time out, rerun the command and complete the flow before the interaction expires.
- If verification fails, confirm the verification setup exists and the bot can assign the configured role.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Opens an interactive UI flow; users must complete buttons, dropdowns, prompts, or modals.
- Still sends classic Discord embeds for at least part of its output.

/verification user

Manually verify a user and apply configured verification roles.

Source	Verification.py:637 (verification_user)
Output	Embed
Checks	has_permissions(administrator=True)

Usage

Run /verification user from Discord slash commands. Fill in the slash options below, then complete any interactive steps shown by Discord.

Arguments

Name	Type	Required	Description / Default
user	discord.Member	Yes	Member to verify without the normal verification flow

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.
- If verification fails, confirm the verification setup exists and the bot can assign the configured role.

Visible error / guard messages in code

- [Error] This command can only be used in a server.
- [Error] Verification has not been set up in this server.
- [Error] I do not have permission to manage one of the configured roles.
- [Error] Discord rejected the role update. Please try again.
- [Error]

Interactive prompts detected

- #-<:Error:1423194250203365458> Discord rejected the role update. Please try again.

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.
- Still sends classic Discord embeds for at least part of its output.

/verify

Get your verification link for this server

Source	Verification.py:689 (verify_cmd)
Output	Components V2, Embed

Usage

Run /verify from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If verification fails, confirm the verification setup exists and the bot can assign the configured role.

Visible error / guard messages in code

- [Error] Verification has not been set up in this server.
- [OK] You are already verified!
-)<:Timeout:1423186126109282344> Link expires in 15 minutes. Do not share this link.

Interactive prompts detected

- Click the link below to complete verification for **
- **. [**→ Click here to verify**](

Operational notes

- Uses Components V2 payloads for the user-facing Discord response.
- Still sends classic Discord embeds for at least part of its output.

/welcome setup

Interactive setup for welcome messages

Source	Welcome.py:246 (setup)
Output	Text or standard interaction response
Checks	has_permissions(administrator=True)

Usage

Run `/welcome` setup from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If Discord says permission denied, give the user the required permission or run the command as an administrator/staff member.
- If the command is hidden or blocked, use an administrator account or adjust command access rules.

Visible error / guard messages in code

- [Error] Failed to load panel:

Operational notes

- Requires the listed Discord permission checks before Discord will allow execution.

`/welcome test`

Test current configuration

Source	Welcome.py:266 (test)
Output	Embed

Usage

Run `/welcome test` from Discord slash commands.

Arguments

No additional slash parameters were detected for this command.

Possible issues, errors, and fixes

- If the command fails, retry from Discord slash command autocomplete and check the bot has access to the channel.

Visible error / guard messages in code

- [Error] No Welcome configuration! No message or embed to show.

Operational notes

- Still sends classic Discord embeds for at least part of its output.
